

A story

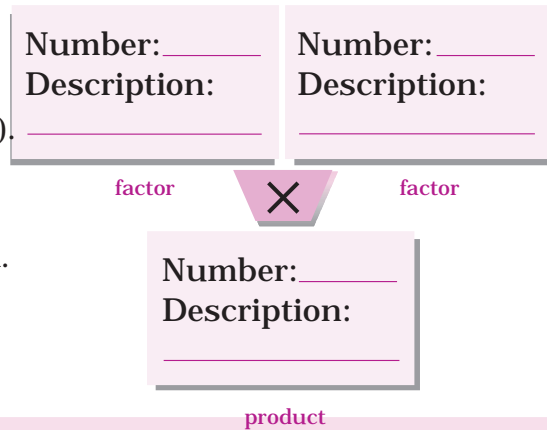

In each aquarium there are 7 fish.
In 4 aquariums there are 28 fish.

This story calls for a multiplication-configuration:
Write the components of the story in a multiplication configuration:

Note: The configuration is not limited to the additive configuration.
In the multiplicative configuration the factors are above and the product is below.

- Write the product set (28 fish) in the relevant place (in the lower rectangle).
- Complete the factors:
One of them: 7 fish in each aquarium.
The other factor: 4 aquariums.

1 Write a multiplication-configuration for the story:

5 children together picked 35 oranges.
Each child picked 7 oranges.
