

D. Fractions and mixed numbers on the number line

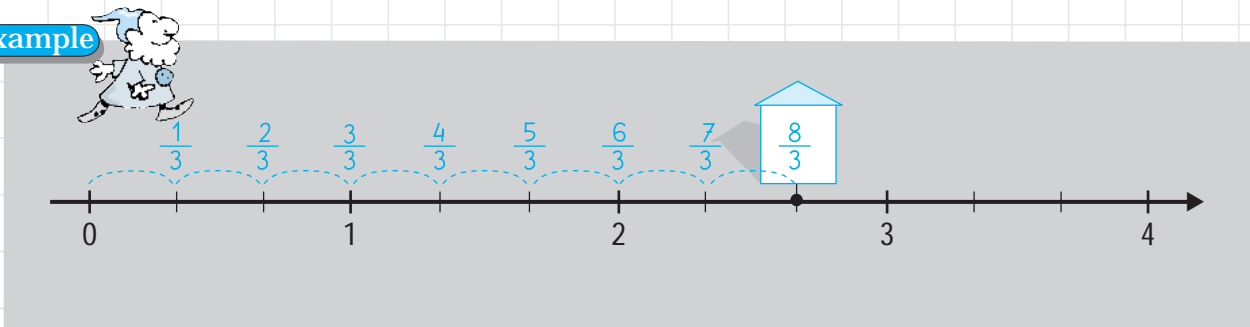

22. Mixed numbers as points on the number line

1 The dwarf likes to walk on the fraction rulers.

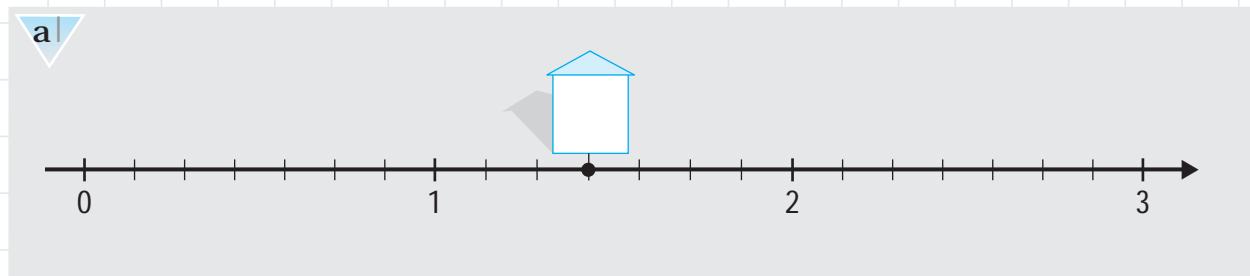

The dwarf always takes the smallest steps marked on the ruler.

- Draw the dwarf's steps from 0 to the point of the house.
- Write the number of the house, as in the example.

Example

a

2 The giant also walks on the fraction rulers.

The giant takes steps of unit segments, and only when he has no other alternative, he takes smaller steps like the dwarf.

- Draw the giant's steps from 0 to the point of the house.
- Write the number of the house, as in the example.

Example
